EDUCATION

University of California, Davis
B.S. in Statistical Data Science

Davis, CA
Sep 2022 – Dec 2026

TECHNICAL SKILLS

Languages: Swift, TypeScript, JavaScript, Python, C/C++, SQL, R, HTML/CSS
Frameworks: SwiftUI, UIKit, React, Next.js, Node.js
Developer Tools: Git, GitHub, GitHub Actions, Docker, Xcode, VS Code, Vercel, Firebase
Libraries: pandas, NumPy, Matplotlib

EXPERIENCE

Buzzit

Davis, CA

Software Engineer (iOS)

May 2025 – Present

- Shipped 20+ production iOS features in **SwiftUI** — spanning feed, profile, calendar, and booking flows — for an app with 1,000+ App Store downloads and 800+ active users.
- Designed and implemented a **StatefulVM** architecture (**LoadState**, **ActionState**, base ViewModel) adopted across all app flows, standardizing async state and error handling app-wide.
- Delivered end-to-end features including an **EventKit**-backed calendar sync adapter, Instagram-style image cropping, native **UITextView** chat link previews, and a type-safe **AppColors** system with full dark mode support.

Narb

Remote

Software Project Lead

Jun 2025 – Jan 2026

- Led full-stack development of a product marketing platform using **Next.js**, **React**, and **TypeScript**, owning features from planning through deployment.
- Architected a reusable component system with 52+ **shadcn/Radix** UI primitives to improve UI consistency and accelerate frontend development.
- Managed 10+ interns through sprint planning, code reviews, task breakdowns, and a repeatable **CI/CD** workflow with **GitHub Actions**.

Pal AI

Remote

Front End Developer Intern

Jul 2025 – Sep 2025

- Built responsive product features in **React** by translating founder requirements into reusable frontend components and shippable user flows.
- Implemented secure authentication flows using **Clerk**, including login, session handling, and protected UI states.
- Improved product polish and maintainability by refactoring UI patterns into reusable components and responsive layouts.

Include

Davis, CA

Front End Web Developer

Jan 2023 – Apr 2023

- Developed responsive and accessible UI components using **React**, **JavaScript**, **HTML5**, and **CSS3**.
- Shipped iterative frontend improvements in an Agile workflow with weekly standups, sprint planning, and team-based code reviews.

PROJECTS

sho.ai (AI Chat Web App) | *Next.js, TypeScript, Tailwind CSS, shadcn/ui, Gemini API*

2025 – Present

- Built and deployed a full-stack AI chatbot to production using **Next.js** and **TypeScript**, integrating the **Gemini API** through a serverless `/api/chat` endpoint — live at sho.ai.
- Implemented client-side loading, error handling, and message state management to support reliable chat interactions.
- Designed a responsive, accessible chat interface with **Tailwind CSS** and **shadcn/ui**, emphasizing clean UX and reusable component structure.

Personal Portfolio Website | *React, JavaScript, HTML5, CSS3*

2025 – Present

- Designed and built a responsive portfolio website with reusable **React** components, mobile-first styling, and accessible layout patterns.
